

## Arrow Cut-outs for Heart Cake

See detailed post and tutorial video for more instruction

Cut out both of the arrow shapes and attach to a wooden dowel with hot glue.

Then glue the backs to each other at each point. (See post and video tutorial for details.)

Cut out both of the feather shapes. Cut a line half way up one feather from the pointy end, then cut a line half way up the other feather from the other end. Slide one feather onto the other using the slits you just cut.

Attach to the end of a separate wooden dowel with hot glue.

(See post and video tutorial for details.)

Insert the wooden dowel with the arrow attached to it into one side of the cake, and the wooden dowel with the feathers attached to it into the other side of the cake.
